

CenterPoint Solution, LLC

CenterPoint Solution and *It's All About You!* Press Kit

Fact Sheet

About CenterPoint Solution:

Founded by Melanie Gass, CenterPoint Solution was created to change the way computer training is traditionally accomplished by providing shorter training timeframes, specific examples, and comfortable learning environments.

Gass, who earned a Bachelor degree from Albertus Magnus College, held key positions in medium and large consumer products companies in various business channels before opening CenterPoint Solution, LLC. Her positions in sales, marketing, finance and operations provided true knowledge and experience needed to understand strategic developments and everyday company operations.

It's All About You!:

It's All About You! is a book created by Melanie Gass to save time in the workday using the computer. It is a step-by-step guide that focuses on the Microsoft® Office® suite and gives ten tips in Word®, Excel®, PowerPoint® and Outlook®. Real-world business examples are included for point of reference, and detailed instructions address the needs of even the most computer illiterate.

Melanie Gass wrote this book based on her experience working with students at CenterPoint Solution. Gass found that students wanted to find ways to leave work on-time so they could enjoy their families and hobbies. Many felt hampered by longer hours and increased workload from job consolidations. Through various time-tests, Gass created a book claiming to save an average of five to ten hours per work week.
